

Mo. Hasnain Mobin Chavhan

+91 7579080415 | chavhanhasnain30@gmail.com | LinkedIn | GitHub

Career Summary

Aspiring **AI & Data Science Engineer** with strong foundations in **Machine Learning, Deep Learning, and NLP**. Skilled in developing **AI-driven applications** such as cybersecurity assistants, document Q&A systems, and drone AI modules. Proficient in **Python, TensorFlow, Flask, Supabase, SQL, and AWS Cloud**. Experienced with **MLOps workflows** and scalable AI deployment. Currently pursuing **B.Tech in AI & DS (CGPA 7.20)** from DBATU with a Diploma in Computer Engineering.

Technical Skills

- **Languages:** Python, Java, SQL, ReactJS
- **ML/DL:** TensorFlow, Keras, Scikit-learn, OpenCV
- **Data Science:** Pandas, NumPy, Matplotlib, Seaborn
- **Cloud/MLOps:** AWS, GCP, Docker, Supabase
- **Frameworks:** Flask, Streamlit, FastAPI
- **Soft Skills:** Leadership, Teamwork, Problem Solving

Education

Chh. Shahu College of Engineering, Chh. Sambhajinagar
B.Tech in Artificial Intelligence and Data Science

Mar 2023 – Jul 2026
CGPA: 7.20 (Till 3rd Year)

Government Polytechnic, Yavatamal (MSBTE)
Diploma in Computer Science and Engineering

Jun 2019 – May 2022
Percentage: 80.86%

Experience

Opshells
AI Intern

Mar 2025 – Present
Remote

- Developed NLP models for automated security testing workflows.
- Built an AI assistant for service booking and workflow automation.
- Integrated AI pipelines with Supabase and PostgreSQL.

DBATU Innovation Cell – NIDAR Program
Team Captain – IT & AI Development

Aug 2024 – Present
DBATU Campus

- Leading 10-member team developing drone automation using AI-based route optimization.
- Built vision modules for object detection and flight tracking.

Projects

AI Code Analyzer – Auto-Documentation & Code Intelligence Tool | FastAPI, React, Ollama

- Built AI system to generate documentation and logic visualization from codebases using RAG.
- Integrated Gemini/Ollama for contextual analysis with Graphviz visualization.

AI-Enabled Document Q&A System | Python, RAG, Streamlit, Gemini API

- Developed a multilingual document assistant with citation-based, context-aware answers.

Be My Eyes – AI Assistance App | TensorFlow, Flask

- Created an app using OCR and TTS to help visually impaired users recognize and hear text.

Achievements

- Completed **Oracle Cloud Infrastructure** and **AI Foundations Associate**.
- Led a 10-member team for DBATU's **NIDAR – Drone AI Project**.
- Developed and deployed over **5+ AI/ML applications**.
- Completed **NVIDIA** and **Fundamental Of Deep Learning**.
